WATER REVITALIZATION

Water like every tangible thing in this world contains information. Whether or not the information is good or bad, it contains information. Water was originally created with contained memory that protected not only the viability of water but protected every being that came into contact with the water. Man, however, altered the pathways water followed, thinking restructuring the water and it's waterways improved the availability, quantity, quality and viability of water. When the original environment was altered, so was the information in the water. Water lost the ability to heal and to cleanse everything with which it came in contact and eventually became a carrier for toxic conditions. That is where mankind is today.

The Water Revitalization information on Infinity Energy Cards like the, CELLGUARDS, MULTI USE CARDS AND RELIEF CARDS actually restructures water and anything containing water back to a state of positive viability. In so doing, water, once again becomes healing unto itself and anything with which it comes in contact.

By attaching the MULTI USE CARDS (1 per 300 sq ft of living or office space onto each in coming water pipe, using 2 tie wraps per card) or faucet, shower pipe, even outside faucets, your water will reduce the bad effects of today's water on you and your family, pets and even your gardens.
